Survival Kit for New Secondary Teachers: Empowering Educators for Classroom Success

"I just want to let you know that I received the book on Monday. It's an amazing resource for any teacher. It's really helping me getting organized for the new school year. Every new teacher should have a copy of this book. Thank you."

—Julie, New Teacher

"A friend of mine gave me your book and I thought I'd let you know how wonderful it has been to read! As a recent graduate, I have found it to be a compilation of everything that I have learned throughout my undergraduate study...and all in one easy to read, easy to find, and easy to understand book! No longer do I have to flip through 10 different notebooks or file folders to locate what I need! I will let you know exactly how much I use it, when I get a job!"

—Beth, New Teacher

"I talked with our new teachers last week and they loved using your Survival Kit for New Teachers! They found it to be user friendly and well organized. They could look up specific items to be addressed from how to get started on the first day to making sure parents get the information they need at home. Each teacher took a handful of sticky notes (tabs) and marked the pages they had used in the first few months.

...They found out that many of the "seasoned" teachers got new information from you too! The kids are complete hit in the District and are being borrowed from the new kids on the block. In all the book has been great! Thanks for getting this information to us! We need all the help we can get. I will continue to sing your praises. Can't wait for the next edition or latest book."

—Lynn O'Connor, District Supervisor of New Teachers, Somerton, AZ

Even though I am still studying I have found the book a vital resource for my field studies this year and my supervising teachers have commented on my professionalism and organization. Little do they know I have gained much of it through "The Survival Kit".

I urge all student and new teachers to purchase the book. It has been the best resource I have bought and is an asset to any professional collection."

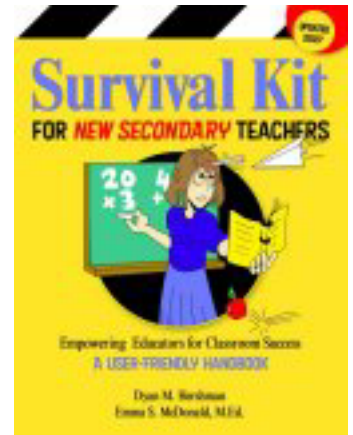

—J. McKay, New Teacher, Australia

"Just wanted to thank you for having the best web site and book. I wrote you in the spring panicked about finding a job. I am a 48 year old retired dentist switching careers, you gave me some good advice to calm me down. I had already ordered your Survival Guide for New Teachers. I got a job in late August teaching high school math. They are thrilled to have me because of all my credentials even though I have no experience. At our new teacher orientation everyone received copies of your book, so I knew I had the right information!"

—John, New Teacher

"Survival Kit for New Teachers is an excellent resource for teachers. It contains a wealth of information and includes topics that will contribute to a successful teaching year for experienced as well as beginning teachers. The Survival Kit book is well organized and written so a teacher at any skill level can easily adapt and implement the ideas shared by the authors. I am excited to find a resource that has been written by teachers who understand the challenges of the first year of teaching."

—Vaughn Gross, Principal, Richardson, TX
